

PARK PLAZA COUNTY
HALL, LONDON
17-STOP TRIPLEX
LIFT GROUP

A project from Lester Controls

PARK PLAZA COUNTY HALL, LONDON 17-STOP TRIPLEX LIFT GROUP

Adjacent to London's South Bank, the Park Plaza County Hall is a four-star hotel located within a few minutes' walk of the London Eye, South Bank Centre, Westminster Bridge and the Houses of Parliament.

Opened in 2008, the Park Plaza County Hall had a group of three internal scenic lifts rising from the ground floor lobby level up to the 14th floor.

The triplex lift group were originally manufactured by the Shenyang Brilliant Elevator Co Ltd and over time, had begun to show signs of age and heavy usage. As a result, an aesthetic and machinery modernisation of the lifts was chosen.

Due to the original MRL technology being installed, Lester Controls worked closely

with Lift Specialists the lift contractor, undertaking the modernisation project. Additionally, and to assist, Lester Controls had on-site meetings with the Client to ensure our MRL controller and landing control equipment easily fitted into the existing MRL landing control cabinets.

With the specifications fully approved, we commenced manufacturing the ALMEGA II control solution with Magnetek HPV900 S2 p/m drives for the 14-stop (plus basement 3 levels) triplex group.

We also supplied a range of ancillaries including indicators, shaft positioning equipment and various fixtures and fittings.
